

PRESS RELEASE

AMK

02.07.2009 / Seite 1 von 1

The well-established manufacturer from Kirchheim yet again proves its innovative process and its sensitive environmental awareness. For many years, AMK has been promoting the use of energy-efficient drives in the industry. The active cooperation with ElektroFahrzeuge Schwaben (EFA-S) from nearby Zell is a logical continuation of these activities. AMK not only supplied a highly efficient three-phase synchronous motor with corresponding controller as main drive of the electric delivery van, but also the corresponding know-how. The combination of more than four decades of experience in development and production of electric drives and the many years of experience in the automotive sector results in bundled competency as a powerful foundation for continuous pioneering achievements.
